

Himanshu Bisht

ComputerScienceUndergraduate - Cyber Security Intermediate

8218595180 himanshubisht4532@gmail.com linkedin.com/in/himanshu-bisht-a6b7b8347 Clement Town, Dehradun

SUMMARY

Computer Science undergraduate specializing in Cyber Security with a strong foundation in Data Structures, Algorithms, and Full-Stack Web Development (MERN stack). Skilled in designing and developing scalable, high-performance applications using modern technologies. Solved 240+ DSA problems, demonstrating strong problem-solving and analytical abilities. Passionate about building real-world impactful systems, optimizing performance, and implementing efficient backend architectures.

EDUCATION

B.Tech in Computer Science (Cyber Security)	Dehradun
Graphic Era University	08/2024 - 05/2027
CBSE Class XII	Kashipur
Army Public School	04/2022 - 04/2023
Percentage – 91.4%	
CBSE Class X	Kashipur
Army Public School	04/2021 - 04/2022
Percentage – 93%	

KEY ACHIEVEMENTS

Full-Stack Applications Development

Successfully developed 5+ full-stack applications that integrate modern technologies and address real-world problems

SKILLS

Programming & Problem Solving:

- Data Structures & Algorithms (Solved 240+ problems)

Frontend Development:

- HTML, CSS, JavaScript, React.js, Next.js
- Built responsive and user-friendly interfaces for multiple projects

Backend Development:

- Node.js, Express.js, REST APIs, Socket.io (Real-time Communication)
- Developed scalable APIs with real-time data handling

Databases:

- MongoDB, PostgreSQL
- Managed datasets with 10,000+ records

Tools & Technologies:

- Tailwind CSS, Git, GitHub, Firebase, Postman

Operating Systems:

- Kali Linux, Ubuntu

PROJECTS

Sketch To Code	09/2024
SketchToCode project to automate converting sketches into code	
•Engineered a full-stack web application using React.js, Node.js, and Express.js to convert hand-drawn sketches into functional code	
•Integrated Gemini API for AI-driven code generation, improving automation efficiency by 40% (estimated)	
RTD – Real Time Thread Detection	02/2025
Platform for Thread Detection in Real Time	
•Built a real-time threat detection system to identify and block SQL Injection and Cross-Site Scripting (XSS) attacks	
•Processed and analyzed 12,000+ malicious payloads to improve detection coverage and accuracy	
•Designed a finite automata-based detection engine for efficient pattern matching of attack signatures	
•Leveraged Google Gemini API for advanced contextual analysis of suspicious inputs at the final validation stage	
Transport & Logistics Management System	06/2025
Real-time logistics management system	
•Developed a real-time logistics platform using React (Vite), Node.js, Socket.io, and PostgreSQL	
•Executed live vehicle tracking and shipment monitoring with real-time updates	
•Reduced manual tracking delays by 30–40% through automation and efficient data synchronization	
HomeSphere – Real Estate Marketplace	08/2025
Realestatemarketplace for property browsing	
•Crafted a full-stack real estate platform using Next.js, GraphQL, Prisma ORM, and PostgreSQL	
•Implemented advanced search and filtering mechanisms, improving property discovery efficiency	
•Leveraged server-side rendering (SSR) to enhance performance and decrease page load time	

EXPERIENCE

Full Stack Developer (Project-Based)

Self-Initiated | Jan 2024 – Present

- Built 4+ full-stack applications using MERN and Next.js stack
- Engineered scalable backend systems with REST APIs and real-time communication
- Solved 240+ DSA problems, improving algorithmic and problem-solving skills
